R topics documented:

---

genericPackageBuilder   *Himel Mallick's R Code*

Description

Builds an R package and adds necessary documentation.

Usage

```
genericPackageBuilder(
  packageName,
  parentDirectory = "/Users/himelmallick/Library/CloudStorage/Dropbox/Repos/",
  build_vignette = TRUE
)
```

Arguments

packageName   Name of the R package you are trying to build. Assumes that all necessary files
               are in place.

parentDirectory
               Parent directory where the package folder is located. Must be modified accord-
               ingly.

build_vignettes
               Build vignette document? Default is FALSE.
